TWM-Trade Winning Master Forex Expert Robot/EA

Thanks for your purchase. This is an upgraded version of Winner-FX Pro EA. Now please focus on the below to make optimum use of it

Step By Step way to install the Trade Winning Master EA Robot

Open your email download it but don't open it. Just copy the .ex4 file. Now open your MT4 screen.

- Click on File→ Open Data Folder → Open MQL4 folder → Open expert folder
- Paste the Trade Winning Master EA.ex4 file here. (Don't try to open the file either copy or just drag and drop here)
- After pasting Trade Winning Master.ex4 file in the expert folder restart or refresh Mt4 and open the chart and set timeframe to H1
- After opening H1 chart, click on Auto-Trading and enable it.
- Set the Trade Winning Master EA on H1 chart and select common option and then tick mark on the box (Common Option: Click on Enable Alerts, Allow Live Trading, Allow DLL Imports and Allow Import of external experts. Rest leave as it is. Don't click on anything else).
- Open input option and change lot size according to your account balance.
- After setting up Trade Winning Master Robot EA, please check the right corner of the and make sure the face is smiling.
- Always use Forex VPS to get maximum out of any EA/Robot.

Important Instructions: Please give Attention

- Equity Size: Minimum $1000 for 0.01 Lot for 1 Pair (Ideally $1200-$1500). If you Choose MM-True in the Setting Input it will take lot size based on your equity size and if you choose MM-False it will take lot size as I mentioned (same lot size all over as I showed in the video).

- Suggested Pairs: EUR/USD & USD/CHF

- See the Important Settings below

| Variable	Value	
Lots	0.1	you can put any lot size which you want for trading
TakeProfit	3

ExtDeviation	75	
ExtBackstep	15	
UseIINWMARROWS	true	
FasterMA	5	
SlowerMA	8	
note1	Faster/Slower Mode Option	
note2	0=sma, 1=ema, 2=smma, 3=lwma	
0=sma, 1=ema, 2=smma, 3=lwma	1	
0=sma, 1=ema, 2=smma, 3=lwma	1	
note3	Your Alert Options	
note4	true using your wav file	
note5	false using default alert	

- Time Frame: The Developer suggests M1, M5 & M15 But I prefer to use H1- I believe Higher

Time-Frame lower DD (lower profits).Lower Time-Frame (Higher DD-Higher Profits)-Your Choice. Use higher balance to trade Lower Time Frame. I personally trade on H1

- **To Let the Trade Winning Master as NON MARTINGALE as same lot size- Keep all as default except lot size. Otherwise if you keep MM on it will increase lot size based on your account balance**

Important notice:

- This is just for your personal use. This is strictly not to share it with others.

- License activation is inbuilt. You can use this Robot on 3 MT4 Demo and 3 MT4 Real accounts only (Your own personal accounts).

- Don't exceed recommended usage and sharing of robot to avoid IP conflict and malfunctioning of robot. I would not be responsible of any kind of losses which may occur (if any).

- **Disclaimer:** Please take calculative risk only. Always trade on Demo Accounts First and if it works well and you gained confidence then only Risk your hard earned money in Live-Real Trading. Trading foreign exchange on margin carries a high level of risk No Matter how good the software tool is, and may not be suitable for all investors. No representation is being made that any account will or is likely to achieve profits or losses similar to those that may be shown. Past performance is not indicative of future results. Individual results vary and no representation is made that clients will or are likely to achieve profits or incur losses comparable to those that may be shown. Before deciding to trade products you should carefully consider your objectives, financial situation, needs and level of experience. The possibility exists that you could sustain a loss of some or all of your deposited funds and therefore, you should not speculate with capital that you cannot afford to lose.

2 Very Important Suggestions: You should not Ignore- Please read the below:

- Always choose a right broker to trade with, this is very crucial. I prefer Zero/Raw Spread or ECN Account of Good Brokers to trade Forex Robot to avoid/minimize spread and slippage issues. Sometimes, due to spread the TP does not hit even if it's reached there and who know market reverse after that point.
- Always Use Forex VPS to trade with Robots/EA's for un-interrupted & smooth trading experience. EA works only when your system and MT4 is on. If you are away and your screen shut down or battery went off or shut down the EA will stop working so its better to spare a few dollars to have a VPS where it will run 24X7 and EA can place positions as and when opportunity arises. Avoiding VPS may impact your Trades**

A Right Broker play a Crucial & Vital role in your trading success. Please choose Zero Spread / Raw Spread or ECN Brokers only to get optimum results. Our recommendations below
